
Air quality: ACOEM Group merges with Indo-Australian company Ecotech

Limonest, France, February 22, 2017. **ACOEM Group (€62 million revenue, 450 employees) announces its merger with Ecotech, Indo-Australian specialist in air quality monitoring (€24 million revenue, 220 employees).**

ACOEM Group's mission is to help companies and public authorities limit their environmental impact, offering products and services that enable them to prevent noise and vibration pollution, improve air quality, and increase the productivity and reliability of industrial machines.

Leveraging this merger as well as its positioning in the high-growth market for monitoring environmental parameters, ACOEM Group seeks to double its sales revenue by 2020.

*The extensive expertise Ecotech possesses in air quality complements our well-established know-how in acoustics and vibration, making the ACOEM Group the world's first company to position itself in the measurement, analysis, and control of all types of environmental parameters. Our merger with Ecotech also enables us to speed up our international growth, notably by opening markets in Australia, India, and Southeast Asia, says **Fabien Condemine, CEO, ACOEM Group.***

*Joining the ACOEM Group is an opportunity for Ecotech to continue its growth, participating in the international success of a group that shares our vision and common values, says **Nicholas Dal Sasso, Managing Director at Ecotech.***

This external growth operation is consistent with the ACOEM Group's strong growth over the past five years (from €40 million revenue in 2011 to €62 million in 2015), and it supports a development strategy that seeks to make ACOEM Group the **worldwide leader in monitoring environmental parameters.**

This merger will enable both companies to leverage their expertise and positioning:

- Ecotech will develop its expertise in air quality over all the zones covered by ACOEM Group, notably Europe, North America, and Brazil.
- ACOEM Group will develop its expertise related to noise and vibration pollution in all the zones covered by Ecotech, notably Australia, India, and Southeast Asia.

About [ACOEM Group](#)

Founded in 2011 following the sale of Areva's 01dB-Metravib business, the ACOEM Group specializes in measuring, analyzing, and controlling environmental parameters. The ACOEM Group offers products and services that prevent noise and vibration pollution, improve air quality, and increase the productivity and reliability of industrial machines to help companies and public authorities reduce their environmental impact. The ACOEM Group is based in Limonest, France, and has four subsidiaries around the world, in Brazil, the United States, Malaysia, and Sweden. The Group generated €62 million in revenue in 2015, 70% of which was from international markets, and currently employs 450 people around the world.

About [Ecotech](#)

At Ecotech, problem solving is in our DNA. For over 40 years we have pioneered innovative solutions in environmental monitoring for air, water, gas, blast, particulate and dust. Headquartered in Melbourne, Australia we now operate in more than 80 countries, manage over 440 real-time environmental monitoring sites certified to internationally recognized quality standards. With two world-class manufacturing facilities in India and Australia both certified to ISO 9001 Quality Management standard, Ecotech generated €24 million in revenue in 2015 employing 220 people around the world. Ecotech is part of ACOEM Group.
